

Laser Design Solutions, Inc.

Mankind has been decorating their surroundings since the Lascaux cavemen applied organic materials to their walls creating magical images. Whether for esthetic decoration or practical purpose we humans are compelled to beautify our environment.

Laser Design Solutions combines the beauty of natural materials, (granite, marble, slate, (both natural and composite), wood glass and metals), with the artistic vision of it's clients to produce stunning and unique works of art that last forever.

An Ancient Art-A Modern Technique

LDS partners with commercial clients, including architects and interior designers, to design and produce commercial installations for office buildings, restaurants, museums, parks and other public places.

The company also brings Laser Etched design to private places - the home and garden - as well as customizing gifts and immortalizing memories in beautiful stone, glass and wood creations.

The company was established on a solid foundation of hand etching and in 2003 Laser Design acquired State-Of-The-Art Laser Etching equipment that allows LDS to meet the ever increasing demand for etched design products. They have a handling capacity of a 4 ft. x 8 ft., 5000 lb. single piece of substrate with an engravable area of 44" x 92". Larger surfaces are created with multiple tiles. If desired, LDS can enhance the Laser Etching with it's own hand etching techniques, producing an exclusive customized design for each special project.

Laser Design Solutions, Inc. is a woman-owned business recognized by the SBA and certified with the federal government. Owner and founder Pat Giancontieri has over 35 years design experience including ownership and management of Yellow No. 5 Design Studio, Inc. formerly in New York City. Ms. Giancontieri started her career as an

award-winning graduate of the Fashion Institute of Technology Textile/Surface Design department.

Her extensive kitchen, bath and domestic interior surface design experience includes

such clients as

Creative Bath, Home Innovations, The Robert Allen Group and Dan River.

Ms. Giancontieri has been hand-etching for 15 years and has developed an intimate understanding of how to mark stone. Working with clients, artists, design and production staffs, asking the right questions, and truly listening to the needs, ideas and concepts presented allows Pat to translate vision into reality. The finished product reflects a passion for design and it's function in beautifying the environment.

As Far as Your Imagination Will Take You!

The possibilities are limitless and the results are magnificent. If a client has a design in mind or would like LDS to create a custom design for a specific application, Laser Design Solutions will work to produce a unique piece of art that will be treasured forever.

The residential applications for laser etchings are excitingly diverse. From murals and decorative plaques to flooring, kitchen cabinets, counter tops and backsplashes, personalized shower door designs and everything in between, Laser Design Solutions works closely with each client to make decor dreams a reality.
